EDUCATION

Brown University, Sc.B. Computer Science, GPA: 4.0/4.0 **May 2027**

- Relevant Coursework: Program Design with Data Structures and Algorithms, Software Engineering, Deep Learning, Networks, Artificial Intelligence, Computer Systems, Software Security, Object-Oriented Programming, Linear Algebra

RESEARCH & WORK EXPERIENCE

Google, *Incoming Software Engineering Intern, Cambridge, MA* **May 2026 - Aug 2026**

- Work on the YouTube Music Podcasts Team to improve podcast chapter viewing on the iOS app using C++

Google, *Associate Software Developer Intern, Sunnyvale, CA* **May 2025 - Aug 2025**

- Integrated shared code layer into Gmail iOS to display security warning banners using **Objective-C**, **Swift**, and **Java**, improving consistency and maintainability for 50+ banner types and removing 800+ lines of code
- Implemented unit, integration, and end-to-end tests to verify the display and management of security banners
- Engineered an action-handling mechanism in the shared layer to execute security banner button actions on the iOS client
- Collaborated with the Client-Side Encryption team and UX designers to create a detailed design document

Department of Computer Science at Brown University, *Undergraduate Teaching Assistant, Providence, RI* **Jan 2026 - May 2026**

- Supported 200+ students in developing coding skills for the Program Design with Data Structures and Algorithms course
- Improved course material, conducted code reviews, led office hours and lab sections, and graded assignments

Computer Graphics Lab at Brown University, *Research Assistant and Intern, Providence, RI* **Feb 2024 - Jun 2025**

- Developed AI-powered learning tools for [Dash](#), a web application sponsored by **Adobe** for interacting with documents
- Built a pronunciation evaluator using **ML models** to provide targeted feedback for language improvement
- Implemented 2 **REST APIs** with **Flask** and **Python** and built the frontend using **React**, **TypeScript**, **CSS**, and **MobX**
- Created a system that generates flashcard decks and provides tailored practice sessions by calling the **OpenAI API**

Department of Computer Science and Linguistics at Boston University, *Research Assistant, Boston, MA* **Apr 2024 - Oct 2025**

- Analyzed how **LLMs** track and update information about entities in text, evaluating their ability to follow objects as they move between locations, change state, and interact with other entities throughout a series of described events
- Built **Python** programs with **PyTorch** and **Pandas** to evaluate entity-tracking performance for 30+ language models, measuring the effects of additional code and math training, as well as alignment tuning, across multiple datasets

SELECTED PROJECTS

[Brown University Women in Computer Science Website](#) **Jun 2024 - Oct 2024**

- Rebuilt the Brown University WiCS website using **React/JavaScript**, **Typescript**, **Bootstrap**, and **CSS**, while integrating **Google Cloud APIs**; communicate with 10 WiCS E-Board members to review and incorporate feedback
- Spearheaded the development of the resources and blog pages to encourage female engagement in the tech industry

[Beat Speech](#) **Sep 2022 - Jun 2023**

- Led and worked with 2 developers to create an app using **Swift** and **Firebase** to help children with speech delays improve their speech production through music therapy techniques; collaborated with the Institute for Music and Neurologic Function
- Winner of 2023 Technovation Girls North America Senior Division** (out of 2000+ submissions)

LEADERSHIP & ACTIVITIES

Brown University Women in Computer Science, *Co-President* **Sep 2023 - Present**

- Partner with technology companies and faculty to host technical workshops and career panels for 400+ female students
- Organize bonding events and mentorship programs for club members to foster a tight-knit community

Technovation Girls, *National Ambassador, President Newton Chapter, Team Leader, and Competition Judge* **Sep 2019 - Present**

- Conducted workshops to teach young women how to code, including object-oriented programming and basic data structures
- Coordinated and oversaw 5 teams in creating mobile apps and business plans that address problems in the community

SKILLS

- Technical Languages:** Java, C++, C, Python, Go, Swift/SwiftUI, Objective-C, TypeScript/JavaScript, HTML, CSS
- Technologies:** React, REST APIs, Flask, Xcode, Docker, Pandas, TensorFlow, PyTorch, MongoDB, Github, Django, Node.js
- Other Languages:** Spanish (professional working proficiency), American Sign Language (beginner)
