EDUCATION

Brown University, B.S. Computer Science, B.A. Linguistics, GPA: 4.0/4.0 May 2027

- Relevant Coursework: Program Design with Data Structures and Algorithms, Artificial Intelligence, Computer Systems, Object-Oriented Programming, Statistical Inference, Introduction to Linguistics, American Sign Language 100 & 200

Newton South High School, GPA: 4.0/4.0

Jun 2023

RESEARCH & WORK EXPERIENCE

Google, *Associate Software Developer Intern, Sunnyvale, CA* May 2025 - Present

- Integrate security warning banners on the iOS Gmail app as a member of the Client Side Encryption team
- Utilize **Objective-C**, **UIKit**, **Swift**, and **SwiftUI** to integrate the server security banner logic into the iOS client

Computer Graphics Lab at Brown University, *Research Assistant and Intern, Providence, RI* Feb 2024 - Present

- Develop AI-powered learning tools using [Dash](#), a web application sponsored by **Adobe** for interacting with documents
- Build a pronunciation evaluator using **ML models** to provide targeted feedback for language improvement
- Create a system that generates flashcard decks and provides tailored practice sessions by calling **OpenAI APIs**
- Implement 2 **REST APIs** with **Flask** and **Python** and build the frontend using **React**, **TypeScript**, **CSS**, and **MobX**

Department of Computer Science and Linguistics at Boston University, *Research Assistant, Boston, MA* Apr 2024 - Present

- Analyze the ability of **LLMs** to track state changes of entities expressed in natural language
- Write **Python** programs using **PyTorch** and **Pandas** to analyze 30+ language models across various data splits, evaluating the effects of additional code and math training, as well as alignment tuning, on entity tracking performance

Department of Computer Science at Brown University, *Undergraduate Teaching Assistant, Providence, RI* Aug 2024 - Dec 2024

- Supported 350+ students in developing coding skills for the Introduction to Object-Oriented Programming course
- Improved course material, re-design handouts, lead office hours and lab sections, and grade projects

LEX Language Project, *Coding & Language Intern, Cambridge, MA* Jun 2021 - Jun 2023

- Employed **HTML**, **JavaScript**, and **CSS** to increase accessibility and inclusivity for the LEX Language Project [website](#)
- Co-organizer for LEXFest (Nov. 2021), an international virtual conference for language acquisition that drew 300+ attendees

SELECTED PROJECTS

[Brown University Women in Computer Science Website](#) Jun 2024 - Present

- Rebuild the Brown University WiCS website using **React/JavaScript**, **Typescript**, **Bootstrap**, and **CSS**, while integrating **Google Cloud APIs**; communicate with WiCS E-Board to review and incorporate feedback
- Spearhead the development of the resources and blog pages to encourage female engagement in the tech industry

Beat Speech Sep 2022 - Jun 2023

- Led and worked with 2 developers to create an app using **Swift** and **Firebase** to help children with speech delays improve their speech production through music therapy techniques; collaborated with the Institute for Music and Neurologic Function
- **2023 Technovation Girls North America Senior Division Regional Winner** ([out of 2000+ submissions](#))

CommunAphasia Sep 2021 - Jun 2022

- Created an icon-based messaging system and speech therapy tool using **Swift** and **Firebase** to help improve communication for people with aphasia; collaborated with Boston University aphasia researcher Claire Cordella.
- [1st place](#), **2022 Congressional App Challenge**; presented app to members of Congress at the Capitol in Washington D.C.

LEADERSHIP & ACTIVITIES

Brown University Women in Computer Science, *Co-President* Sep 2023 - Present

- Partner with technology companies and faculty to host technical workshops and career panels for 300+ female students
- Organize bonding events and mentorship programs for club members to foster a tight-knit community

Technovation Girls, *National Ambassador; President Newton Chapter, Team Leader, and Competition Judge* Sep 2019 - Present

- Conducted workshops to teach young women how to code, including object-oriented programming and basic data structures
- Coordinated and oversaw 5 teams in creating mobile apps and business plans that address problems in the community
- Provided feedback on 20+ app and business plan submissions from 15 countries for the Technovation Girls competition

SKILLS

- **Technical Languages:** Python, Java, Swift/SwiftUI, Objective-C, C, C++, TypeScript/JavaScript, HTML, CSS
- **Technologies:** React, UIKit, Flask, REST APIs, Django, Docker, MobX, Bootstrap, MongoDB, Firebase, PyTorch, Pandas
- **Other Languages:** Spanish (professional working proficiency), American Sign Language (beginner)
