EDUCATION

Brown University, B.S. Computer Science, B.A. Linguistics, GPA: 4.0/4.0 May 2027
• Relevant Coursework: Program Design with Data Structures and Algorithms, Software Engineering, Artificial Intelligence, Computer Systems, Software Security, Object-Oriented Programming, Linear Algebra, Statistical Inference, Linguistics

RESEARCH & WORK EXPERIENCE

Google, *Associate Software Developer Intern, Sunnyvale, CA* May 2025 - Aug 2025
• Integrated shared code layer into Gmail iOS to display security warning banners using **Objective-C**, **Swift**, and **Java**, improving consistency and maintainability for 50+ banner types and removing 800+ lines of code
• Implemented unit, integration, and end-to-end tests to verify the display and management of security banners
• Engineered an action-handling mechanism in the shared layer to execute security banner button actions on the iOS client
• Collaborated with the Client-Side Encryption team and UX designers to create a detailed design document

Computer Graphics Lab at Brown University, *Research Assistant and Intern, Providence, RI* Feb 2024 - Present
• Develop AI-powered learning tools for **Dash**, a web application sponsored by **Adobe** for interacting with documents
• Build a pronunciation evaluator using **ML models** to provide targeted feedback for language improvement
• Implement 2 **REST APIs** with **Flask** and **Python** and build the frontend using **React**, **TypeScript**, **CSS**, and **MobX**
• Create a system that generates flashcard decks and provides tailored practice sessions by calling the **OpenAI API**

Department of Computer Science and Linguistics at Boston University, *Research Assistant, Boston, MA* Apr 2024 - Present
• Analyzed how **LLMs** track and update information about entities in text, evaluating their ability to follow objects as they move between locations, change state, and interact with other entities throughout a series of described events
• Built Python programs with **PyTorch** and **Pandas** to evaluate entity-tracking performance for 30+ language models, measuring the effects of additional code and math training, as well as alignment tuning, across multiple datasets

Department of Computer Science at Brown University, *Undergraduate Teaching Assistant, Providence, RI* Aug 2024 - Dec 2024
• Supported 350+ students in developing coding skills for the Introduction to Object-Oriented Programming course
• Improved course material, re-designed handouts, led office hours and lab sections, and graded projects

LEX Language Project, *Coding & Language Intern, Cambridge, MA* Jun 2021 - Jun 2023
• Employed **HTML**, **JavaScript**, and **CSS** to increase accessibility and inclusivity for the LEX Language Project [website](#)
• Co-organizer for LEXFest (Nov. 2021), an international virtual conference for language acquisition that drew 300+ attendees

SELECTED PROJECTS

Brown University Women in Computer Science Website Jun 2024 - Oct 2024
• Rebuilt the Brown University WiCS website using **React/JavaScript**, **Typescript**, **Bootstrap**, and **CSS**, while integrating **Google Cloud APIs**; communicate with WiCS E-Board to review and incorporate feedback
• Spearheaded the development of the resources and blog pages to encourage female engagement in the tech industry

Beat Speech Sep 2022 - Jun 2023
• Led and worked with 2 developers to create an app using **Swift** and **Firebase** to help children with speech delays improve their speech production through music therapy techniques; collaborated with the Institute for Music and Neurologic Function
• **Winner of 2023 Technovation Girls North America Senior Division** (out of 2000+ submissions)

CommunAphasia Sep 2021 - Jun 2022
• Created an icon-based messaging system and speech therapy tool using **Swift** and **Firebase** to help improve communication for people with aphasia; collaborated with Boston University aphasia researcher Claire Cordella
• **1st place, 2022 Congressional App Challenge**; presented app to members of Congress at the Capitol in Washington D.C.

LEADERSHIP & ACTIVITIES

Brown University Women in Computer Science, *Co-President* Sep 2023 - Present
• Partner with technology companies and faculty to host technical workshops and career panels for 300+ female students
• Organize bonding events and mentorship programs for club members to foster a tight-knit community

Technovation Girls, *National Ambassador, President Newton Chapter, Team Leader, and Competition Judge* Sep 2019 - Present
• Conducted workshops to teach young women how to code, including object-oriented programming and basic data structures
• Coordinated and oversaw 5 teams in creating mobile apps and business plans that address problems in the community
• Provided feedback on 20+ app and business plan submissions from 15 countries for the Technovation Girls competition

SKILLS

- **Technical Languages:** Java, Python, C++, C, TypeScript/JavaScript, HTML, CSS, Swift/SwiftUI, Objective-C
- **Technologies:** React, REST APIs, Flask, Docker, Pandas, TensorFlow, PyTorch, MongoDB, Github, Django, Node.js, Xcode
- **Other Languages:** Spanish (professional working proficiency), American Sign Language (beginner)
